

Another Chris-Craft on Deep Creek Lake

As a follow up to the *Mountain Discoveries* Fall/Winter issue we have located another beautiful 1960 Chris-Craft on Deep Creek Lake. It is owned and was restored entirely by Tony Rossignuolo; an every day project that has taken 3 years to complete. The boat was bought by Tony's grandparents, Ernie and Lucille Screen, in 1972 and has been at Deep Creek Lake ever since. It was originally owned by Skeeter Bowman, Bowman's Marina in McHenry, from 1960 to 1972 as his personal boat.

When Tony started the restoration, the craft was estimated to be at a condition of 4, on a scale of 1-10, with 10 being in the best condition. The craft is beautifully restored to its original condition, including the engine. Tony says he would never sell it; it stays here at Deep Creek and brings great joy to his grandparents.

Tony is a student at Frederick Community College and works at Silver Tree Marina during the summers.
